WORK EXPERIENCE

Capgemini, Poznan

July 2022 - March 2024

Software Engineer

Poznan, Poland

- I was a fullstack developer for a customer management website project for Deutsche Telekom, one of the leading telecommunication companies in Europe. I demonstrated my skills and expertise in both frontend and backend development by performing various tasks throughout the project lifecycle
 - One of my main responsibilities was writing efficient and maintainable code for the website's functionality and appearance. I used various technologies and frameworks such as Angular, PostgreSQL, Angular Material UI, and Java to create a responsive and user-friendly website. I also performed rigorous testing and participated in peer code reviews to ensure adherence to the best coding practices and standards
 - Another responsibility was improving the code quality and readability of the website. I applied clean code principles and techniques such as naming conventions, modularization, refactoring, and commenting to make the code easier to understand and modify. I also created comprehensive documentation for the website, explaining its features, architecture, and dependencies.
 - Lastly, I collaborated with other developers in daily stand-up meetings, where we reported on our completed tasks, provided support and feedback to each other, and suggested ways to optimise the project's performance and user experience. I also communicated with the project manager and the client to ensure that the website met their requirements and expectations.

OTHER PROJECTS

[WildRydes](#)

November 2023

- I created a comprehensive serverless website hosted in AWS
Tech Stack: Vue, AWS, API Gateway, DynamoDB

[Hag Partner](#)

January 2022 - May 2023

- Developed and maintained a website for a business offering services to Uber Eats drivers in Poznan, Poland
Tech Stack: WordPress, Figma, CSS, HTML

[Personal Blog Website](#)

January 2022 - current

- Established a personal blog website for sharing tech ideas and insights
Tech Stack: WordPress, Figma, CSS, HTML, Elementor

SKILLS

Tech Stack: Java, Spring Boot, JDBC, REST API, Java MVC, JPA, JUnit4, Docker, Angular, JS, TS, Git, AWS

Other Technologies: SQL, CRUD; algorithms and data structures, object-oriented design; CSS, HTML; WordPress, Jira

State Management: Redux, NgRx

Methodologies: Agile/Scrum

Soft Skills: Problem Solving Team Collaboration, Strong Communication, Analytical Thinking

Languages: English and Polish – fluent and advanced respectively; Italian – conversational; Ukrainian and Russian – bilingual

EDUCATION & CERTIFICATIONS

Adam Mickiewicz University

March 2023

Bachelor of Computer Science in English (GPA 4.26/5)

Poznan, Poland

Redwood High School

June 2018

GPA 3.82/4

Visalia, California

- **Activities:** played American football, Varsity; volunteered 100 hours across California; passed a week-long workshop about teaching English in Washington D.C; camp supervisor at Outdoor School of Science and Conservation, California

Certifications *(you need a Pluralsight account to open the certificates)*

[AWS Certified Cloud Practitioner](#)
